# Timetable 2024 | 2025

If you want to discover the Alpine world at its best, you'll soon realise there's no escaping the Gornergrat (3,039 metres above sea level).

With its sunny viewing platform, accessible all year round, the Gornergrat is a top excursion destination – and not just because of its altitude.

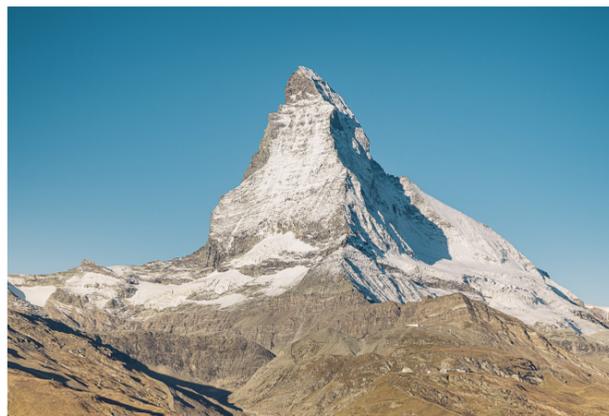

Surrounded by 29 four-thousand-metre peaks, Switzerland's highest mountain, the Dufourspitze (4634 metres above sea level), and the second largest glacier in the Alps, the Gorner Glacier, it offers a mountain panorama that could not be more breathtaking. The Gornergrat Bahn has been guaranteeing that even the journey to the panoramic mountain will be a top-class experience for over 125 years.

The lower terminus of Europe's highest outdoor cog railway is in the well-known Valais holiday resort of Zermatt. Trains run every 24 minutes during the high season, covering a distance of 9,339 metres.

Negotiating impressive bridges, galleries and tunnels and surrounded by idyllic forests and Alpine meadows, the line passes stone gorges and mountain lakes. And everywhere you look – majestic mountain giants, with the Matterhorn

as the crowning glory.

## Alpine Garden

### Alpine flora on Rotenboden

#### Every day until the snow falls

Strolling through the Alpine Garden at the Rotenboden station at 2800 m above sea level feels like a walk in paradise. The Alpine Garden offers a view that takes your breath away and the Matterhorn, the Riffelhorn and the Riffelsee seem close enough to touch.

Nature lovers will find unique high alpine vegetation here. Some plants thrive exclusively here. The Alpine Garden covers more than 5,000 square metres and is the highest Alpine Garden in Europe. The flora on the Gornergrat is one of the richest in species in the Swiss Alps and is unique because of its special location. Here, many plant species grow much higher than in comparable areas and it is a pleasure to explore them.

To immerse yourself even further in the world of alpine plants, numerous signs with QR codes have been set up along the way, which tell you exciting facts about the flora and allow you to admire the plants from all sides even when they are not in bloom.

#### Code of conduct

Plant life at 2800 metres above sea level is hard and fragile, and visitor pressure on the Gornergrat is high. In order to preserve and protect this unique natural heritage, the following rules must be observed:

- Keep to the paths at all times – stepping on the plants damages/kills them
- Do not pick plants in the Alpine Garden
- Keep dogs on a leash and hold children by the hand
- Don't leave any rubbish behind
- Please do not touch plants or signs

## Stone Family

### Stone by stone

#### Every day until the snow falls

Stone towers are found in all populated areas of the world. This is also the case on the Gornergrat below the ZOOM building. Who can create the tallest stone tower? An experience for the whole family with the best view of the Matterhorn.

A souvenir photo with the hashtag #MyGornergratMoment is a must!

## Meet the Sheep

included in the ticket

### Rub noses with the Blacknose sheep

Between the end of June and mid-September, around 125 Blacknose sheep graze on the Gornergrat.

#### Meet the Sheep

It's a picture that doesn't exist anywhere else in the world: Blacknose sheep that are at home high above Zermatt and with a view of the Matterhorn. With their spiral-shaped horns, fluffy wool and black patches, the Blacknose sheep are something very special.

From the end of June to September, they graze between the Gornergrat and Riffelberg stations and look forward to welcoming visitors. Thanks to GPS trackers in their collars, the cute sheep can be located. A shepherdess accompanies the sheep on their adventures so the cuddly four-legged friends are not alone. Six days a week, she tells visitors exciting stories from their everyday lives and is happy to answer any questions they may have.

Guided walks can be organised on request.

#### Meet the Sheep View trail

Information about the Gornergrat and its flora and fauna can be found at 11 interpretation panels dotted along the path between the Gornergrat and Riffelberg. Duration approx. 2 hours.

Find additional information about Meet The Sheep here: [gornergrat.ch/meet-the-sheep](http://gornergrat.ch/meet-the-sheep)
